

Feedback New Zealand seminar April 2010

"Thanks so much for the seminar - it was thought- provoking and I came back to a very challenging clinic - wondering just how to integrate what I was learning with the people who sat before me. Some go there so easily and for others it seems like a foreign land. It was interesting that my second patient completely dissociated through her consult and went into a carbo-veg state. When I rang her the next day she said I could never have gone there without the trust we have built up over all the other consultations."
