DR. SHUBHANGI CHOUGULE

LECTURER: Excellent, homeopathy is a science and art is what we learnt from first day of taking admission to B. H.M.S but it was a theoretical. Because of Dr.Dinesh's presentation I could experience scientificity and art of homeopathy. I came to know the systematic, logical way of reaching to similimum.

LECTURE CONTENT: It was definitely practical when I attended other seminars I felt that this can be done only by seniors. But after attending this seminar, I came to know that I also can reach to the source of remedy simply, logically, scientifically, confidently.

ORGANISATION: Excellent.

SUGGESTIONS: Every time the understanding gets better. And as you attend lectures of dedicated people you understand the difference between

belief and faith, between liking and desire, between love and passion and then the connection between verbal and non verbal develops. Thank you sir!

August 2009...

LECTURER (DR.DINESH CHAUHAN):

October 2008...

- *"Since I started attending the series of seminar, my case taking has improved each time in leaps and bounds. I find myself grown a step further. Like I was able to do well in cases which speak whose level of experience is high, but the cases where the patient didn't speak, or was at fact level used to cause frustration in me. ..And I got my answer in this workshop, and it really motivated me, ..The process that you showed in the case of disc prolapsed was a great... Not only learning but I enjoy the warmth that I get from m'am and sir...."*
- *"Dr.Dinesh presented all the cases in a very detailed way. At all level of case-taking, he cleared our doubts without hesitation. Very clear and perfect way of explaining things. 'Insight to deep pathological cases'-learnt many things and are very thankful to guide us in such cases.."*
- *"With this seminar one thing is sure that this system is possible for me to use though at present I find it a little difficult to practice.... M'am's starting prayer was very essential and important for concentrating in lecture... thank you"*
- *What made the dish very interesting and delicious was the right proportion of all the ingredients. I got the recipe from a few influences....1 kg of case videos, ½ kg of case taking, 2 table spoonful of experiences, 1 tea spoon potency, 1 tea spoon of material medica, ½ spoon philosophy which was blended well. The*

garnishing was of course done by the speaker's great sense of humor!....With lighting the "diyas" to attract the positive energies (as they term it) and the intention to spread the light of homeopathy, I must say that Dr. Chauhans have inspired a lot of students and homeopaths. Events like these are instrumental in helping the homeopathic world stay focused and get them one step closer to their goals each time!
